

TELL YOUR SENATORS WE NEED STRONG GLOBAL WARMING LEGISLATION NOW.

Rising temperatures. Disastrous droughts. Melting glaciers and polar ice sheets. Polar bears headed to extinction. The climate crisis isn't on the way. It's here. And time is running out to stop it.

In the next few months, Congress could act boldly by passing legislation that slashes global warming pollution and launches America into a clean, green energy future — one that creates millions of new jobs and averts environmental catastrophe. Unfortunately, the fossil-fuel lobby — coal, oil and backward-looking utility companies — are spending millions of dollars to pressure Congress to draft a weak bill. We can't let that happen.

Go to www.NRDCActionFund.org and tell your Senators to strengthen and pass the Climate Security Act. It's time to start a clean energy revolution that will boost our economy *and* save the planet.
