

# Climate Plan Analysis -- Industrial Sector

## Administrative Action

Candidate	Donald Trump	Joe Biden	Bernie Sanders	Elizabeth Warren	Pete Buttigieg	Michael Bloomberg	Andrew Yang	Amy Klobuchar	Tom Steyer	Candidate
<b>End New Leases for Fossil Fuels on Public Lands</b>	The Trump Administration has greatly increased fossil fuel leases on public lands, threatening treasured places and worsening the climate crisis.	"Protecting America's natural treasures by ... banning new oil and gas permitting on public lands"	"We will immediately end all new and existing fossil fuel extraction on federal public lands."	"on my first day as president, I will sign an executive order that says no more drilling — a total moratorium on all new fossil fuel leases, including for drilling offshore and on public lands."	"We will work to... ban new leases on public lands of fossil production."	"Establishing a moratorium on all new fossil fuel leases on federal lands."	"We also absolutely should not be providing leases to companies that are going to exploit public lands – both on and offshore – to harvest oil, gas, and coal.... We need to stop the practice of providing these leases, and move to end the current ones as quickly as possible."	"To help accelerate the transition away from fossil fuels, Senator Klobuchar will ban new fossil fuel permits on federal lands."	"Keep publicly-owned oil, coal, and gas in the ground by stopping the expansion of fossil fuel leases and establishing a careful process to wind down federal onshore and offshore fossil fuel production."	<b>End New Leases for Fossil Fuels on Public Lands</b>
<b>End New Leases for Fossil Fuels in Public Waters</b>	The Trump Administration has proposed opening up nearly all federal waters in the Atlantic, Pacific, and Arctic oceans to offshore drilling.	"He will not only re-establish the U.S. commitment to remove Arctic waters from consideration for oil and gas leasing, he will also work with Arctic Council member nations to extend this moratorium globally."	"we must ban offshore drilling.... Congress must not open new areas to offshore oil drilling and ban drilling in the Arctic Circle and the Arctic National Wildlife Refuge."	"on my first day as president, I will sign an executive order that says no more drilling — a total moratorium on all new fossil fuel leases, including for drilling offshore and on public lands."	"We will place the issue of climate change front and center in multilateral dialogue at the Arctic Council and focus on reducing emissions from the Arctic, including by opposing drilling there"	N/A	"We also absolutely should not be providing leases to companies that are going to exploit public lands – both on and offshore – to harvest oil, gas, and coal.... We need to stop the practice of providing these leases, and move to end the current ones as quickly as possible."	"The Trump Administration has revoked... guidance documents and rules that protect people's safety, health and the environment when it comes to... offshore drilling.... Senator Klobuchar will undertake a thorough review of all the repealed guidance and rules, and work to restore our environmental and safety protections."	"Keep publicly-owned oil, coal, and gas in the ground by stopping the expansion of fossil fuel leases and establishing a careful process to wind down federal onshore and offshore fossil fuel production."	<b>End New Leases for Fossil Fuels in Public Waters</b>
<b>Institute a Climate Test for All New Fossil Fuel Infrastructure</b>	Instead of considering the climate consequences of fossil fuel infrastructure, "The Trump Administration approved the Dakota Access Pipeline, the Keystone XL Pipeline, and... has streamlined permitting for Liquefied Natural Gas (LNG) terminals."	"Committing that every federal infrastructure investment should reduce climate pollution, and require any federal permitting decision to consider the effects of greenhouse gas emissions and climate change."	"We will ensure fossil fuels stay in the ground by stopping the permitting and building of new fossil fuel extraction, transportation, and refining infrastructure. Additionally, Bernie will repeal Trump's Executive Orders (Orders 13867 and 13868) which fast-tracked construction of the Keystone XL and Dakota Access pipelines, and revoke all federal permits for those projects. He will also deny all Section 401 permits for fossil fuel infrastructure."	"Elizabeth would subject new infrastructure projects to a climate test: a stringent environmental impact review conducted by independent entities without conflicts of interest related to the project. We should reject new fossil fuel infrastructure and projects that will emit greenhouse gases for decades to come."	"All new infrastructure, including pipelines, will be subject to a climate-positive test."	N/A	"we need to do everything we can to prevent further investment in infrastructure designed to support the oil/gas/coal industries.... [including] any new pipeline or similar infrastructure, especially any that would cut across contested land."	"The Trump Administration has revoked... guidance documents and rules that protect people's safety, health and the environment when it comes to... offshore drilling.... Senator Klobuchar will undertake a thorough review of all the repealed guidance and rules, and work to restore our environmental and safety protections."	"ending the buildout of new fossil fuel infrastructure, approving new federal infrastructure permits and investment only for projects that do not hinder our progress towards achieving net-zero global warming pollution by 2045,"	<b>Institute a Climate Test for All New Fossil Fuel Infrastructure</b>
