

# Climate Plan Analysis -- Industrial Sector

## Administrative Action

Candidate	Donald Trump	Joe Biden	Bernie Sanders
<b>End New Leases for Fossil Fuels on Public Lands</b>	The Trump Administration has greatly increased fossil fuel leases on public lands, <b><i>threatening</i></b> treasured places and <b><i>worsening</i></b> the climate crisis.	"Protecting America's natural treasures by ... banning new oil and gas permitting on public lands"	"We will immediately end all new and existing fossil fuel extraction on federal public lands."
<b>End New Leases for Fossil Fuels in Public Waters</b>	The Trump Administration has proposed <b><i>opening up</i></b> nearly all federal waters in the Atlantic, Pacific, and Arctic oceans to offshore drilling.	"He will not only re-establish the U.S. commitment to remove Arctic waters from consideration for oil and gas leasing, he will also work with Arctic Council member nations to extend this moratorium globally."	"we must ban offshore drilling.... Congress must not open new areas to offshore oil drilling and ban drilling in the Arctic Circle and the Arctic National Wildlife Refuge."
<b>Institute a Climate Test for All New Fossil Fuel Infrastructure</b>	Instead of considering the climate consequences of fossil fuel infrastructure, "The Trump Administration approved the Dakota Access Pipeline, the Keystone XL Pipeline, and... has streamlined permitting for Liquefied Natural Gas (LNG) terminals."	"Committing that every federal infrastructure investment should reduce climate pollution, and require any federal permitting decision to consider the effects of greenhouse gas emissions and climate change."	"We will ensure fossil fuels stay in the ground by stopping the permitting and building of new fossil fuel extraction, transportation, and refining infrastructure. Additionally, Bernie will repeal Trump's Executive Orders (Orders 13867 and 13868) which fast-tracked construction of the Keystone XL and Dakota Access pipelines, and revoke all federal permits for those projects. He will also deny all Section 401 permits for fossil fuel infrastructure."
